公司简介

二十世纪六十年代以来,钢结构建筑以其优美的外观、坚固轻巧的结构、合理的价位、规模化的生产、较短的施工周期,占据了建筑业的很大市场。近两年来,我国的翻结构建筑已初具规模,在建筑领域的地位举足轻重。

为适应我国钢结构事业的发展,本公司多年来一直从事钢结构用屋面及墙体围护压型钢板设备的生产。同时又致力于对各种新品的研制和开发。从最初的单层瓦楞板压型生产线到现在已开发制造了十几个系列的压型钢板生产线·完全能满足所有钢结构建筑的需要。如系列隐咬式墙面屋面板生产线系列彩钢夹芯钢板生产县系列c型钢、z型钢数控带冲孔檩条生产线;系列露面钢承板生产线;聚氨酯复合板生产线;系列有梁、无梁柱拱型屋面系列生产设备等;另外-本公司还生产系列液压剪板机、系列数控折弯机、系列钢卷整平横切机组、系列钢卷纵剪机组等生产设备.我公司具有雄厚的技术力量,高层次的管理人才,强大的生产能力和完善的跟踪质量检测。公司已跻身于国内行业强手之林,用户遍及全国各地,产品远销世界各地,如澳大利亚,加拿大,俄罗斯,巴西,南非等,欢迎广大新老客户前来咨询洽谈。

公司竭诚与国内外所有钢结构企业合作,为厂家提供精良的设备和优质的服务,愿我们在合作中共同进步、共司发展,为进一步发展壮大我国的钢结构实业而努力。

Introduction

Since 1960s, steel construction with its beautiful appearance building, firm and light and handy structure, rational price, the production of scale, shorter construction cycle, occupied very big market of the construction industry, Enter over the past two years, the steel construction building of our country has already begun to take shape, it is with a very inportant position in the field of building.

Adapt to our country steel const ruction development, Our Company engaged in manufacturing the roll forming set of roofing panel and wall panel used for steel construction for many years. Besides, we are devoted to the research and development of various kinds of new products. We have developed more than ten series of roll forming steelmachine from initial single layers of roofing ifon, totally can meet all steel construction need of a rchitecture, the series bite and latent type wall and roof panel production line; Serial color steel and insert core steel production line; purlin productionline of Serial C section steel and Z section steel line numerical control with drilling. Serial steel structural floor panel the production line of the panel; production line of Guard rail panel of the expressway, production line of PU sandwich panel. Series sets of girder columniation curve and no girder columniation curve of Roof panel system and so on.

We Company have rich technical force , high-level managerial talent , strong production capacity and perfect one follow quality testing . We company rank among domestic of the same trade woods of rival already now , users spread all over all parts of the country , The products find a good sale in Southeast Asia , South Africa etc .

Our company coope rates with domestic and international steel construction wholeheartedly , offer the suprior equipment and high—quality service for producer , Wish US progress together in coope rating , common development , make joint efforts to develop the steel construction under taking of our country further .

设备概况

- 1、ZGM型生产线采用先进的生产工艺以气、电、机械为一体,是加工和平隔热彩钢夹芯板的专用机械设备。
- 2、ZGM型生产线工作速度采用电脑控制无级调速,使该生产线运行速度稳定,操作简单。
- 3、ZGM型生产线根据用户的需求,长度由电脑定位控制,该系统定位精确,且在触摸屏上定时显示,并自动计数、修正
- 4、ZGM-X型多功能复合机生产流水线,配套制定的成型机,可生产十种板型。
- 5、瓦楞复合板的板型可根据用户的需要进行设计和修改,以满足不同用户的需要。

ZGM型彩钢夹芯板复合流水线设备,能一次性复合成瓦楞型复合板,全套流水线由装料开卷系统、成型系统、切断装置、复合系统(压筋、涂胶、加温、复合、卷边、开槽、整边、气动、自动切断)组成,整个过程由电脑控制,是生产工业厂房、仓库等房面板和墙板不可缺少的设备。

Equipment summary

- 1.ZGM production line adopts advanced technology integrating pneumatic, electric and mechanical technologis. It is the special machine for the production of the heat insulated color-steel sandwich plates.
- 2. The operation speed of ZGM production line is stepless computer-controlled to realize the stable operation speed and simple operation of the production line.
- 3. The length of the ZGM production line can be controlled by the computer system based on the user's requirements. The computer system has precise orientation and has timed display on the touch screen. And it has automatic counting and correcting.
- 4.ZGM-X multiple-function compound production line is equipped with the molding machine and can produce 10 types of plates.

5. The shapes of the corrugated compound plates can be designed and modified according to user's requirements so as to satisfy needs of different users.

ZGM color-steel sandwich plate compound production line can compound the corrugated compound plates for once. The whole set production line is composed of the feed unrolling system, molding system, cutting device, compounding system (rib pressing, glue coating, heating, compounding, flanging, notching, trimming, pneumatic and automatic cutting). The whole process is computer-controlled. It is the necessary equipment for producing the faceplates and wallboards for industrial workshops and warehouses.
